DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul A. Levy on 1/31/2008.

The application has been amended as follows:

In Claim 16, Line 3, "data received from the image pickup means by a" has been changed to -data by a--.

In Claim 17, Line 5, "data received from the image pickup means by a" has been changed to -data by a--.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the prior art teaches the use of a system and method for picking up an image to produce an image and delaying transmittal of the image data by a predetermined amount. Furthermore, the prior art teaches a system for detecting a variation in the image object from the image data captured by a camera to generate a trigger signal in response to variation detection. However, the prior art does not teach the system wherein the detecting step and delaying step receive the image data at the same time and the predetermined delay time is adjusted in response to the predetermined variation detected in the detecting step. Therefore, the claims are allowed over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
